TEAM THUTO | FNB APP OF THE YEAR HACKATHON 2026

ThutoVest: 90-second demo video script

Seven scenes, about 175 spoken words, which fits 90 seconds at a calm pace. Left column: what is on screen. Right column: what to say.

Samalani Maluwa, Reshoketswe Makhura, Tebogo Sasa | thutovest.vercel.app

Before you record

• Tap **Reset demo** on Tatenda, Nandi and Ridgeline, so the story starts clean.

• Open two browser windows side by side: Tatenda on the left, Ridgeline on the right. All demo passwords are **Demo#2026**.

• Zoom the browser to about 110% so the text is readable in the video.

• Have the closing slide (page 20 of the presentation) ready in another tab.

• Record in two takes: scenes 1 to 4 (Tatenda and Ridgeline), then scenes 5 to 7 (Nandi and the close), and join them.

The script

Time	On screen	Say
0:00 to 0:12	Landing page, then Tatenda's dashboard	"Last year almost 900,000 students applied to NSFAS, and over 200,000 applications were incomplete. ThutoVest takes a student from 'I want to study' to 'I can graduate.'"
0:12 to 0:25	Dashboard: progress bar, next best action, funding gap	"Meet Tatenda, 17, in Grade 12. ThutoVest builds her a personal plan, gives her one next step at a time, warns her before deadlines, and shows her funding gap: R92,400."
0:25 to 0:45	Ridgeline tab: Candidates, Make offer. Then Tatenda's tab: the offer arrives and she signs	"Verified sponsors find her through an anonymised profile. Ridgeline sends an offer, and it appears on her phone within seconds. Because she's under 18, her mother co-signs, and the money goes straight to the university, never to the student."
0:45 to 0:55	Ridgeline types "pay a R500 admin fee". The message is blocked	"Scams are blocked. Any request for a fee is stopped and the sponsor is suspended."
0:55 to 1:15	Sign in as Nandi: Marks and progress, Use a sample report, Save and analyse, Send tutor request	"Funding is only half the job. Nandi is in first year. She adds her marks, and the app spots that Maths dropped seven points, gives her advice, and lets her ask her sponsor for a tutor in one tap."
1:15 to 1:25	Ridgeline's Student progress: Zanele at risk, Send early warning	"Her sponsor sees the slip early and can send a fair warning before any funding is lost."
1:25 to 1:30	Closing slide with the QR code and team names	"ThutoVest, by Team Thuto. Try it at thutovest.vercel.app."

Tips

- Speak slowly. If you run long, cut scene 2 to one sentence, not the money or safety scenes.
- Leave the WhatsApp bot out of the video: it is on the slides and takes too long to show.
- Say the numbers clearly: R92,400, under 18, seven points.
- End on the QR code for two seconds so judges can scan it.

NSFAS figures: NSFAS board chair, reported by TimesLive and EWN on 6 January 2026 (893,847 applications, about 218,000 incomplete). All students and sponsors in the demo are fictional.
